RE: Disestablishment of Pre-Health Thematic Minor (PHLTMINU)

I am writing to initiate the process of disestablishing the Pre-Health Thematic Minor housed in the College of Science. We would like to set the last admit term to Spring 2023 which will be the last term we admit any undergraduate students. The number of students declared in this minor is very low to be a productive program. UArizona also offers many more options today than when this minor was created many years ago and students are also able to work with their major advisor to create their own "thematic" minor.

Sincerely,

Rebecca Gomez, PhD
