Re: Termination of thematic minor with an emphasis in Educational Technology

This memo serves as a justification for the termination of the UA South Thematic minor with an emphasis in Educational Technology effective July 2019.

The minor currently has no students enrolled and will shortly become out of compliance with ABOR regulations. The associated graduate programs and certificates are also being discontinued. For these reasons we are requesting the immediate termination of the minor.

Some courses (INFV) cross-listed with the ETCV prefix will continue to be offered with the ETCV prefix until the de-cross-listing is approved. This will not impact the termination of the minor. Courses will continue to be available in the Applied Science Informatics program and in the Informatics minor as an option to serve students interested in this content and career path.

Signed,

Dr. Ryan M. Straight
Assistant Professor & Co-Program
Director, Educational Technology
Faculty Fellow and Honors Professor
